

## Minnicare® Mini Fog System

### A Modern Method to Enhance Small Space Disinfection.

The Mini Dry Fog system provides an easy-to-use, high technology solution for confined-space fogging. The combination of our highly effective Minnicare® Cold Sterilant chemical and our state-of-the-art Dry Fog delivery system enables users to rapidly and safely deliver Minnicare vapor to even the most complex areas. Its sanitary and autoclavable design permit its use in the most critical areas within pharmaceutical and other industries concerned with maintaining the utmost levels of sterility.

### Standard Features & Benefits

#### Short Process Time

Typically, the entire process can be completed in less than 3 hours, depending upon room size and ventilation system efficiency, compared to up to 3-5 days with some conventional systems.

- Substantially lower cleanroom downtime
- Regular use may contribute to maintaining low particulate levels due to the suppression of airborne particles by the droplets
- Lack of noise and ultrasonic vibration during use

#### Optimal Efficacy with Minnicare

Minnicare is a peracetic acid and hydrogen peroxide based proprietary chemistry developed by Minntech for optimized biocidal efficacy.

- EPA registered for fogging as part of normal cleaning and disinfection procedures
- Faster and safer to use than existing aldehyde based disinfectants
- Effective bactericide, fungicide, virucide and sporicide
- Fully biodegradable

#### Ultrafine Droplets

The Minnicare Dry Fog equipment is designed to produce fine droplets that average 7.5 microns in diameter which will ensure even dispersion of the Minnicare solution throughout the room.

- Controlled and consistently accurate droplet size
- Minimized risk of condensation
- Ensures penetration into normally inaccessible areas
- Dispersion of Minnicare vapor in all areas of room

#### Highly Flexible System

The system is easily adaptable to differing space dimensions and can be adjusted to reach all areas of a small confined space.

- Readily transportable and can be used in multiple locations
- Robust construction, with easy maintenance
- Does not require electrical connection
- Autoclavable design with Sanitary construction using 316L Stainless Steel for key components
- Single units are suitable for use in volumes up to 20 m<sup>3</sup> or a 700 ft<sup>3</sup> room and will disperse up to 500 ml of liquid Minnicare solution
