

## Replacements for Donaldson® Dryflo™

### ***Need a replacement for the Dryflo?***

*ECO Environmental Filtration introduces a retrofit cartridge for the Donaldson/Torit Dryflo Mist Collector.*

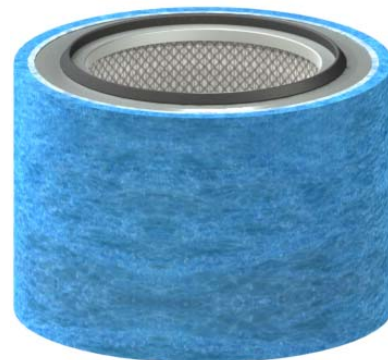

***How it works:*** Dryflo systems incorporate a panel 1<sup>st</sup> stage filter that removes larger mist droplets, metal dust and swarf. The cartridge filter combines the 2<sup>nd</sup> stage (outer wrap) and 3<sup>rd</sup> stage (cartridge) filtration to remove and drain the oil mist that passes thru the 1<sup>st</sup> stage.

### ***BENEFITS of ECO CARTRIDGES:***

- *2<sup>nd</sup> stage wrap material stops more oil before it gets to the 3<sup>rd</sup> stage filter media resulting in longer filter life and less re-entrainment of oil into the air*
- *3<sup>rd</sup> stage filter construction help maintain lower pressure drop and higher efficiency*
- *Cost savings*
