Silver Shield® Cartridges

Powder release is extraordinary. You can't compare Silver Shield to paper, felt, or blended media cartridges. Our aluminum impregnated media allows for an extremely high recovery rate. The aluminum finish helps dissipate the electrical charge of the paint particles, and the anti-static characteristics make it extremely difficult for paint to adhere to the media in normal operating conditions. The improvement over paper is dramatic with up to 80% less paint powder being lost.

ECO's SILVER SHIELD cartridge is clearly the choice for wise powder coating operators

Silver Shield filters are washable, reusable, and nearly indestructible!

Low dust holding capacity: A paper filter in powder coating holds 25 pounds of expensive reclaimable powder when change out occurs. Silver Shield filters hold only 2 – 3 pounds.

ECO's Silver Shield cartridges are proven solutions to your powder coating needs.

BENEFITS:

- Low dust holding capacity
- Higher efficiencies
- Maximized blow-off of dust cake
- Unobstructed airflow
- Competitive pricing
- Washable

REPLACEMENTS FOR:

- Torit®
 - MAC®
 - AAF®
 - Gore®
 - FARR®
 - Micro Air®
 - UAS®
 - Nordson®
 - Wagner®
 - Wheelabrator®
-and many others
