

**FJORD AVIATION PRODUCTS** SPR-V Dust Cover is engineered and designed to fit the CLA-VAL single point underwing fueling nozzles, including the military D-1 and D-2. The impact absorbing urethane dust cover protects the nose seal from damage and seals against external water and debris from entering the nozzle, thus adding another layer of protection for fuel systems from contaminants and moisture. Bonus– if there is some fuel in the dust cover when removed then it might be time to check the nozzle for internal residual fuel leaks.

FEATURES:    UV, fuel and chemical resistant  
                  Flame Retardant / Non Combustible  
  
                  Temperature Resistant from -20° to 200°F  
  
                  Exceeds FAA and Military standards  
  
                  Stainless lanyard assembly included (replacement lanyard available)

COLOR:        Red

Protect the nose seal of your CLA-VAL underwing nozzle and prevent contaminants & moisture from entering the nozzle for years (2 year warranty, lanyard not included) with **FJORD AVIATION PRODUCTS SPR-V** and help maintain “clean dry fuel to the aircraft.”
