## BioMAX HEPA 95

### High Efficiency Particulate HEPA Air Filter

**BioMAX HEPA Filters** are designed to provide the highest level of filtration available for commercial and industrial applications. They are widely used in hospitals, clean rooms, pharmaceutical plants, and in hundreds of other systems where clean air is critical in the protection of people, processes, and equipment.

## BioMAX HEPA 99.97

### HEPA Filters for Hospital, Commercial, and Industrial Applications

**BioMAX HEPA Filters** are designed to provide the highest level of filtration available for commercial and industrial applications. They are widely used in hospitals, clean rooms, pharmaceutical plants, and in hundreds of other systems where clean air is critical in the protection of people, processes, and equipment.

## BioMAX HEPA 99.99

### HEPA Filters for Hospital, Commercial, and Industrial Applications

**BioMAX HEPA Filters** are designed to provide the highest level of filtration available for commercial and industrial applications. They are widely used in hospitals, clean rooms, pharmaceutical plants, and in hundreds of other systems where clean air is critical in the protection of people, processes, and equipment.

## BioMAX HEPA 99.999

### HEPA Filters for Hospital, Pharmaceutical, and Cleanroom Applications

BioMAX HEPA Filters are designed to provide the highest level of filtration available for commercial and industrial applications. They are widely used in hospitals, clean rooms, pharmaceutical plants, and in hundreds of other systems where clean air is critical in the protection of people, processes, and equipment.

## BioMAX HEPA HC

### High Capacity HEPA Filters for Hospital, Commercial, and Industrial Applications

**BioMAX HEPA Filters** are designed to provide the highest level of filtration available for commercial and industrial applications. They are widely used in hospitals, clean rooms, pharmaceutical plants, and in hundreds of other systems where clean air is critical in the protection of people, processes, and equipment.

## BioMAX CS

### Minipleat HEPA Filters for Clean Rooms and High Purity Applications

**BioMAX CS** filters are engineered to provide the optimum combination of efficiency and airflow. They are used in a wide range of applications, including pharmaceutical facilities, hospitals, biotech laboratories, and other environments where control and removal of airborne contaminants is paramount.

# BioMAX V2000

## High Capacity Minipleat HEPA Filters

**BioMAX V2000** high capacity HEPA filters are designed for more strenuous operations (500 FPM with initial resistance of 1.20" W.G.). These filters are constructed with ten individual minipleat packs that are secured in a specially designed sheet aluminum v-bank frame.
